

The Prevent Cancer

Super Colon™

is coming to Auburn!

Where: Auburn Mall

When: Thursday, April 15
10 a.m. - 9 p.m.

Colorectal cancer is **90% preventable and 90% treatable** if detected early, yet it remains to be the second leading cancer killer in the US.

Lifestyle-related risk factors include smoking, obesity, lack of exercise, diets high in red and processed meats, alcohol use and even diabetes.

20 feet long 8 feet high

The exhibit is an Incredible, Inflatable, Interactive colon, that teaches people about the risks, symptoms, prevention, early detection and treatment options for colorectal cancer. Visitors get a close-up look at healthy tissue, tissue with non-malignant colorectal diseases, as well as tissue with various stages of colorectal cancer. Brought to you by the Prevent Cancer Foundation and The Patrick Dempsey Center for Cancer Hope & Healing.
